

## About the NETFA PowerPoint Presentation

---

### Aim of the PowerPoint (PPT) Presentation

The presentation has been developed for use by bicultural/bilingual peer educators and facilitators to support the delivery of health education sessions to Arabic and Somali speaking communities who may have experienced or been affected by FGM/C.

### Who can use this resource

This resource is recommended for use by bicultural/bilingual peer educators and facilitators, health educators and community educators who have professional training and support in delivering and facilitating education sessions.

### About this resource

The PowerPoint presentation supports and complements the NETFA [Resource and Activity Guide](#).

### Key Messages

Consisting of 40 slides, the presentation summarises the key messages of Modules 1-4 of the NETFA Resource and Activity Guide. The key messages have been translated into Arabic and Somali.

### Tailoring the presentation

The PowerPoint presentation is flexible in scope and content so that facilitators can tailor the PowerPoint slides to suit the audience and context of delivery. For example, it can be used to develop a new, or complement an existing, health education program.

Additional slides consisting of images and a video are also included to reinforce some of the key messages. These slides can be added or deleted to tailor the presentation according to the audience's needs.

Before delivering any session, facilitators are encouraged to read the NETFA Resource and Activity Guide and the [Best Practice Guide](#). The NETFA Resource and Activity Guide provides suggestions for topics and activities. The NETFA Best Practice Guide is also helpful in outlining a national set of guiding principles that inform health education programs targeting communities affected by FGM/C. Both resources are available online via the NETFA website ([www.NETFA.com.au](http://www.NETFA.com.au)).
